Air-termination tube Al Glass fiber 10m Ø80mm

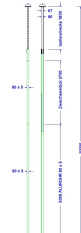

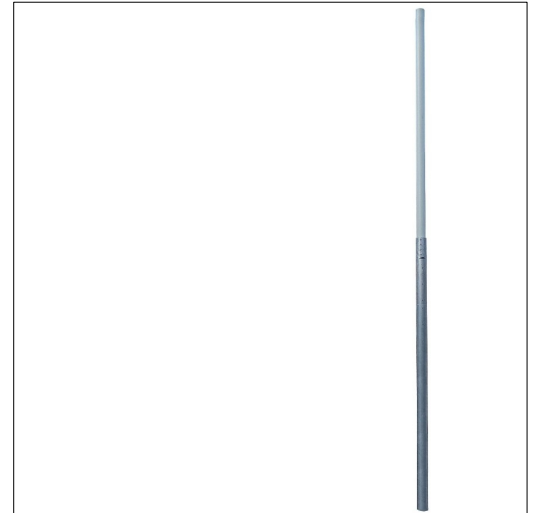

Air-termination tube Al Glass fiber 10m Ø80mm

Technical description

Insulated air termination tube for the internal routing of Guardian insulated conductors. The lower part of the air terminal is made of aluminum tube $\varnothing 80 \times 5$ mm, the upper part is made of 1,8 m glass fiber reinforced plastic tube $\varnothing 78 \times 4$ mm. Total lengths of the air terminal is 10 m.

Advantages:

Insulated air terminal mast for the internal routing of Dynasphere insulated conductors for Guardian
 The lower part of the air terminal is 5 meters long and made of aluminum tube $\varnothing 80 \times 5$ mm
 The upper part is also 5 meters long, with the tip consisting of a 1.8-meter glass fiber reinforced plastic tube $\varnothing 78 \times 4$ mm
 Total lengths of the air terminal is 10 m
