

ELIT

Massive round down conductor galv. steel

Solid round down conductor in galvanized steel that comes in a coil of approximately 80 meters

Technical description

Steel coil, hot-dip galvanized (Z 350) - \varnothing 10 mm - 50 kg for use in lightning protection systems or earthing systems.

Galvanization: Minimum weight ~ 350 g/m²; Coating thickness = 50 μ m (average value)

Cross section: 78 mm²

Short-circuit current (50 Hz), 1 s, = 300 °C: 5.5 kA

1 coil: approx. 80 m

Manufactured according to DIN EN 62561-2.

Advantages:

Round conductor made of galvanized steel for use in lightning protection systems or earthing systems

Manufactured according to DIN EN62561-2

Product name/ Art.nr/ GTIN	ELIT GALV-LEDER-80M-50KG/ 40150240/ 7070810040643
According to:	DIN EN62561-2
Diameter conductor	10 Millimetre
Conductor cross section	78 Square millimetre
Outer diameter incl. sheat/cover	10 Millimetre
Conductor category	Class 1 = solid
Conductor material	Steel
Material quality conductor	Other
Characteristic conductor material	Half hard
Surface protection	Hot-dip galvanized
Weight	62 Kilogram per 100 metres
