

ELIT

Uninsulated solid aluminum (Al) conductor Ø8mm cross section
50mm² (50 meters)

Technical description

Solid round uninsulated aluminum conductor (Al) with diameter Ø8mm - which corresponds to approx. cross-section 50mm². The conductor is intended for use as a down conductor or as a mesh in a lightning protection system. The wire is easy to handle and shape, and can be used with a wide range of fasteners. Supplied in a manageable bundle/coil of 50 meters.

Advantages:

- Solid uninsulated aluminum conductor for a variety of applications
- Easy to handle and shape as desired
- A more affordable alternative to copper
- Can be used in a wide variety of fasteners
- Sold in bundles/coils of 50 meters

Product name/ Art.nr/ GTIN	ELIT UISOLERT-ML-AL-Ø8-50M/ 40160000/ 7070810001453
According to:	---
Diameter conductor	8 Millimetre
Conductor cross section	50 Square millimetre
Conductor category	Class 1 = solid
Number of strands	1
Conductor material	Aluminium
Characteristic conductor material	Half hard
Surface protection	Untreated
Sheathing material	None
