

ELIT FJS10x80x680-25H

Copper rail for earth connections with 25 holes of $\varnothing 13\text{mm}$ for mounting on the barracks with insulator

Technical description

Copper busbar in size 10x80x680mm for connecting ground conductors. The busbar has space for 25 connections and has connection holes of $\varnothing 13\text{mm}$. The ground busbar is tinned which makes it more resistant to the environment it is installed in. Normal installation is indoors or in places that are not normally exposed to high humidity or water.

Advantages:

The rail has many connections
Mounted on a bracket with insulators, it has a wide range of applications

Product name/ Art.nr/ GTIN	ELIT FJS10x80x680-25H/ FJS10x80x680-25H/
According to:	---
Number of connections	25
Material	Copper
Surface of the contact rail	Tinned
Rail length	680 Millimetre
Rail width	80 Millimetre
Busbar thickness	10 Millimetre
Mounting method	Other
Horizontal mounting	Yes
Vertical mounting	Yes
Insulated mounting	Yes
