

ELIT

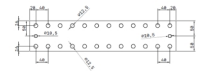

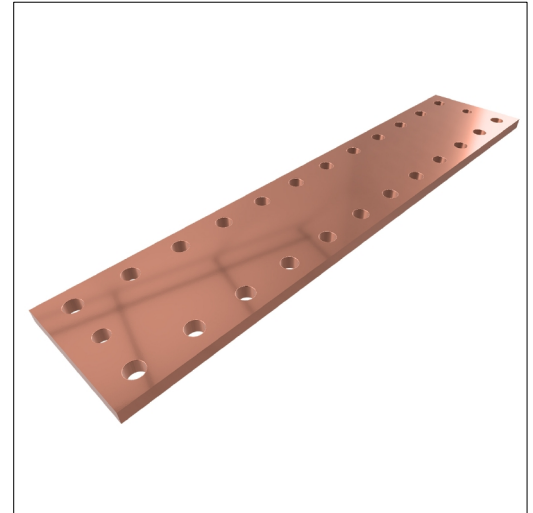

Copper rail for grounding connections with 24 holes of $\varnothing 12,5\text{mm}$ for mounting on the bracket.

Technical description

Copper busbar in size 10x100x480mm for connecting ground conductors. The busbar has space for 24 connections and has connection holes of $\varnothing 12,5\text{mm}$. In addition, there are two holes on the busbar for connection to a bracket with insulator for easy mounting on a wall, etc. with $\varnothing 10,5\text{mm}$. The ground busbar has no surface treatment and is supplied in ordinary red copper.

Advantages:

The rail has many connections
Mounted on a bracket with insulators, it has a wide range of applications

Product name/ Art.nr/ GTIN	ELIT JS500x100x10- $\varnothing 12,5$ -24H/ RJS480x100x10-24H/
According to:	---
Number of connections	24
Material	Copper
Surface of the contact rail	Untreated
Rail length	480 Millimetre
Rail width	100 Millimetre
Busbar thickness	10 Millimetre
Mounting method	Other
Horizontal mounting	Yes
Vertical mounting	Yes
Insulated mounting	Yes
