

ELIT C58 Ground rod

Coupling clamp for Cu-wire against 5/8" ground rods

Technical description

This coupling clamp can be used on 5/8" earth rods and is made for attaching copper wire in the size 10-50mm² to a 5/8" earth rod. The clamp is solid, has a large contact surface, is made of brass and comes with a stainless steel mounting bolt that provides long durability. The contact point of the clamp against copper wire is made in a V-shape which ensures that the cords on the multi-wire copper wire are kept together and provides a constant contact surface on the entire cross section.

Advantages:

Solid clamp with large contact surfaces.
Gather the cords on multi-strand copper wire for good contact.
Stainless steel bolt for long life and large area of use.

Product name/ Art.nr/ GTIN	ELIT C58 Ground rod clamp/ 30100010/ 7070810000944
According to:	---
Construction type	Connection terminal
Diameter earthing connection	14 - 17 Millimetre
Clamping range cable	6 - 50 Square millimetre
Material	Brass
Surface protection	Untreated
