

# ELIT C12

Connection clamp for Cu-wire to 1/2" ground rod

## Technical description

This connecting clamp can be used on 1/2" ground spikes and is designed to attach copper wire in the size 16-50mm<sup>2</sup> to a 1/2" ground spike. The clamp is solid, has a large contact surface, is made of brass and comes with a stainless steel fastening bolt that provides long durability. The clamp's contact point against the copper wire is made in a V-shape which ensures that the strands of the multi-stranded copper wire are kept together and provides a constant contact surface across the entire cross-section.

## Advantages:

Solid clamp with large contact surfaces  
Collects the cords on multi-stranded copper wire for good contact  
Stainless steel bolt for long life and wide range of applications

Product name/ Art.nr/ GTIN	ELIT C12/ 30100025/ 7070810000968
According to:	---
Construction type	Connection terminal
Diameter earthing connection	12 - 13 Millimetre
Clamping range cable	16 - 50 Square millimetre
Material	Brass
Surface protection	Untreated
