

ELIT HSF-HK250

Handle for welding molds with welding cans up to #250g

Technical description

This handle fits all ELIT Pro-molds with a welding can size up to #250g. This handle makes it much easier to operate the welding mold in terms of opening/closing, but also because of the heat that the welding mold gets after each use. The handle is easily threaded into pre-drilled holes in the mold and locked in place with two wing nuts.

Advantages:

Allows easy opening and closing of welding molds
Enables safe handling of hot welding molds
Ready to fit all ELIT Pro molds up to #250g
