

ELIT Avgreningsklemme

ELIT C-press clamp C95

Technical description

Branch terminal / C-clamps (branching sleeves) made of electrolytic copper. The "C" shape enables splicing and branching of e.g. earth conductors and generally copper conductors above and below ground without cutting the main cable. Made according to IEC-61238.

Length of crimping terminal: 30 mm.

Minimum cross-section of conductor: 150 mm²

Maximum cross-section of conductor: 190 mm²

Can be used with crimping tools from several suppliers.

The following crimping die is used for this C-clamp: C12CC95. Please contact us if you need a tool and crimping die.

Advantages:

Branch terminal / C-clamp terminals made of electrolytic copper (Cu)

Can be used with crimping tools from several suppliers

Length of crimping terminal: 30 mm

Manufactured according to IEC-61238

(Can be supplied complete with crimping tool and crimping die)

Product name/ Art.nr/ GTIN	ELIT Avgreningsklemme C95/ 30300011/ 7070810005222
According to:	---
Material	Copper
Surface protection	Other
Cross section through-wiring core	150 - 190 Square millimetre
Length	30 Millimetre
Suitable for solid conductors	Yes
