

ELIT Betongsokkel

Concrete base frost-proof | 17 kg Ø325 mm

Technical description

Frost-proof concrete base / concrete foundation with a diameter of Ø340 mm for use as ballast on a free-standing lightning arrester stand. The concrete base has a weight of 17 kg and is one of the components needed to build a free-standing lightning arrester. Based on the height and size of the lightning arrester and the wind strength it must withstand, the correct number of ballasts is selected in each individual case.

Advantages:

Frost-proof concrete base / concrete foundation
Dimensions: Ø 340mm, height: 120 mm, weight: 17 kg
Can be stacked on top of each other to increase the weight
Underlay mat / protective plate sold separately

Product name/ Art.nr/ GTIN	ELIT Betongsokkel Ø340MM/ 40150044/ 7070810003419
According to:	EN 62561-2
Model	Base
Material	Concrete
Surface protection	Untreated
Diameter	340 Millimetre
Weight	17 Kilogram
