Wall mount single w/distance 55mm Guardian

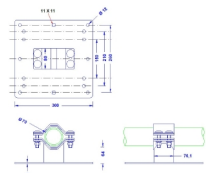

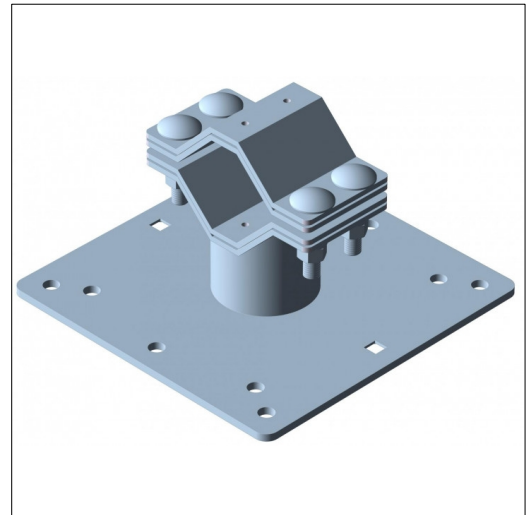

Stainless steel wall clamp for Guardian masts up to 12m and Ø70-80mm

Technical description

Stainless steel wall clamp for Guardian masts with a diameter of 70-80 mm. Wall distance 64 mm. Intended for masts up to 12.0 m long. Instructions for installation on concrete walls: For installation, drill 4 x 12 mm holes in the concrete (min. 80 mm depth), corresponding to the outer holes in the mounting plate. 4 x M10 bolt anchors are inserted into the holes. The pipe clamp is placed on the bolt anchors, and each is screwed in place with a washer and nut. The bolt anchors are NOT part of the product. Total weight: 6.7 kg.

Advantages:

Stainless steel wall clamp for Guardian masts with a diameter of 70-80 mm
Wall distance 64 mm
Designed for masts up to 12.0 m long

Product name/ Art.nr/ GTIN		ELIT ENKEL-VEGGF-V2A-80-85MM/ 40150217/ 7070810038695
According to:		RoHS2 (Directive 2011/65/EU) and REACH (Regulation (EC) No. 1907/2006): This product complies with the substance requirements and other requirements of these regulations.
Mounting type bar	With screw clamp	
Rod diameter	70 - 80 Millimetre	
Material of holder	Stainless steel 304 (V2A)	
Mounting type holder	Bore hole	
Material of saddle clamp	Stainless steel 304 (V2A)	
Material base part	Steel galvanised	
Thread size (metric)	12
