

ELIT

Bimetallic contact in Al-Cu

ELIT bimetallic contact in aluminum and copper for tape 25 x 3 mm

Technical description

Use ELIT bimetallic connectors for seamless joining of aluminum and copper strips, 25 x 3 mm. These connectors provide a neat and efficient splicing method, eliminating the need for tinning, riveting or winding the joint.
Tightening torque: 20 Nm

Advantages:

Corrosion-free joining of aluminum and copper strips
Provide a neat and efficient joining method
Manufactured according to EN 62561-1

Product name/ Art.nr/ GTIN	ELIT BKLEM-ALU-CU-25X3MM/ 40180042/ 7070810040568
According to:	BS EN 62561-1 Class H
Type of accessory/spare part	Connection element
Accessory	Yes
Material	Aluminium/copper
Surface protection	Untreated
